In pharmacy, this oil was used for a long time for its effects laxatives It remains present as excipient in numerous patent medicines.

In cosmetic, she is used to smooth and protect the hair of the men. She is also used to strengthen and lengthen lashes and eyebrows. Besides his nourishing function and revitalizing the castor oil favors considerably the regrowth of hair and their also bring of the volume.

6- Oil of organic grape:

A-Description:

We knew the virtues of a glass of wine a day, but we did not suspect all the wealth contained in a tiny grape seed. His secret ? He contains poly phenols, these molecules are rich in vitamin E, which have the power to strengthen the natural protection of the skin and to fight effectively against the free, responsible radicals in 80 % of the ageing. By managing to stabilize these molecules, in the 90s, professor Vercauteren, opened the door to a new art to take care of his body physical and cosmetic Properties: the grape, the fruit king is rich in directly comparable sugars, as well as in vitamins (C, Has, B1, B2, B5, B6, B9, E, PP, P), in mineral salts, in acids and in trace elements: phosphor, potassium, calcium, magnesium, sulfur, chlorine, silica, manganese, iron, iodine, zinc and copper. This wealth in fact one of the best energy food which proposes us the nature.

Properties of the grape seeds:

Soothing, exfoliating, refreshing, Anti radicalaire, Antioxydant (which makes it an ally in the fight

against the ageing), Regenerated, Nourishing, rich in OPC (which protect against the toxic effects of UV). The grape seed is also recommended to treat the problems of heavy legs and of Varicosity . The extract of grape juice used in beauty care contains an important quantity of tannins, vitamins and acids of fruits which confer him quite at once actions exfoliating soft, lightening and protector.

BioMed

7-Oil of organic lemon BIO-MED:

A-Description:

The main virtues of the essential oil of lemon are, no doubt, its actions antiseptics, healing and bactericidal powerful and his function of stimulation of the production of white blood cells. Proved for a long time, these virtues meet used in a very adequate way in ancestral practices such the addition of the lemon in teas or grogs of the weakened and sick persons - for revitaminer, to stimulate them immune systems and to fight against germs or spraying of lemon juice of seafoods and oysters, tasted believed, "to sterilize" them - the bactericidal power of the lemon acting on 90 % of bacteria within quarter of an hour. In view of these pharmaceutical qualities, the use of the essential oil of lemon during epidemics of flu, infectious diseases or accés feverish is thus completely justified. She will then be used there nébulisation (in case of bronchitis or of cough), cataplasms or friction (in case of fever), distribution (in case of affections respiratory) or in gargle (in case of stomatites or inflammations of the gums).

His anti-inflammatory action is considerable, in particular in massage, during the bouts of rheumatism or arthritis either during cramps or tendinitis. His dépuratifs powers, diuretics, vermifuges and liqueurs make one effective Allier of the digestive disorders, in particular during the difficult days after a holiday, during the lack of appetite and during the nausea of the children from 6 years.

His qualities veinotoniques, fluidifiantes some blood, draining and décongestionnantes return the

essential oil of effective lemon during phlébites, sensations of heavy legs, presence of cellulite. on the contrary his haemostatic effect, associated with its antiseptic and healing effect, recommends it during wounds of cuts, epistaxis.

In cosmetic cutaneous application the lemon uses its astringent virtues, tonifiants and antiseptics to fight against the acne, the skins with fat or mat trend, the warts and the breakable nails.

8-Oil of the nuclei of dates BIO-MED

A-Description:

He contains a complex of 7 constituents which act in synergy to repair the damage of the time to which the weakened mature skins are more sensitive. These are:

- Phytostérols: protective action.
- Phytostéroïdes: compensators of the hormonal decline
- Isoflavones: anti age
- Acid ursolique: regenerating
- Policosanols: alcohols fat which strengthen the lipid cement and the barrier of the skin,
- Tocotriénol: oxidizing anti
- Vitamin A: oxidizing anti

➡ This complex allows to stimulate the production of the collagen 1, the majority collagen of the dermis and responsible for the flexibility and the firmness of the skin. He also allows to repair the damage caused in cells(units) by the oxydatif stress (intern bound to the ageing and extern bound to the solar brilliance, to the pollution and to the cigarette) .Il also has a protective function, by increasing the natural defenses of the skin against the oxydatif stress.

9- Oil of sesame BIO-MED

A-Description:

The oil of sesame was a powerful and effective antioxidant. In subcutaneous fabrics(tissues), this Oil neutralizes free radicals.

She penetrates under the skin quickly. The molecules of oil of sesame seeds maintain the good cholesterol (HDL) and lower the bad cholesterol (LDL). The oil of sesame seeds is a regulator of growth of cells and slows down the growth and the retort of these. In the small bowel and the colonist, some cells are fed with some fat instead of the sugar. The presence of oil of sesame seeds can supply in these cells essential nutriments which they need.

She maintains the supple and elastic skin she heals and gives very good results onto stretch marks. It is a precious help for the teenagers with problems acneic.

The oil of sesame seeds is oil which is really good for the young skin. She checks eruptions and neutralizes toxin which develop on the surface of the skin and in pores. With some sesame oil, no cosmetic is necessary. The skin will keep its youth and a good health. Used on baby's skin, the oil of sesame seeds protects from the gluteal érythrème. In the nose and the ears, she protects against the common pathogenic germs of skin. For the pupils who are in the presence of the other children infected by colds and coughs, the oil of sesame seeds protects against the viruses and the bacteria which are in the air.

10- Jojoba organic oil BIO-MED

A-Description:

Jojoba oil virgin yellow gold and sweet nutty is a wax (97% of wax esters) in non-greasy feel, used in cosmetics, like Shea, for its content unsaponifiables (50%).

The oil of Jojoba oil is qualified, but because of its chemical composition, but rather a liquid wax, which contains 97% wax esters.

Jojoba oil is one that is closest to the natural sebum secreted by our glands: it is one of the few oils with a composition similar to human sebum.

It creates a non-greasy hydration layer on the surface of the skin.

It is a stable oil that does not go rancid at all (it is resistant to oxidation and heat).

Jojoba oil has the distinction of being perfectly stable in the absence of triglycerides in its composition (wax esters present). It does not turn rancid and does not require the use of preservative or antioxidants in the cosmetic formulation.

This oil is interesting because it contains high levels of polyunsaturated fatty acids long chain (20-24 carbons) and is a direct source of long chain AGI for the organization without having to seek its enzymatic equipment (desaturase and elongase), which is often weakened (during aging).

Jojoba oil is also characterized by its high content of unsaponifiables: it plays an important role in the protection of the skin (absorption in the UV-B, λ max: 280 nm) and for the healing of the skin.

11- Argan organic oil BIO-MED

A-Description:
